PROJECTS

Movie Ticket Generator (02/2020 - 04/2020)

- Task is essentially made on PHP language, to create film tickets for the clients. It was a group project where my responsibility here is to make seat booking and clients account handle page.

Old Book (08/2019 - 11/2019)

- The goal here is to make a website which would enable users to sell, borrow, or buy old or used books at low prices. My responsibility here is frontend development and making the website responsive.

Smart Cane (02/2018 - 04/2018)

- Simple and noble motive of this project was to help the less gifted people without the ability of sight to walk a confident path.

Event Management System (01/2018 - 04/2018)

- It was an individual task dependent on C++ language. It demonstrates the forthcoming occasion to be come up, occasions which will be held in the week and occasions which are finished. Furthermore, user can join to any up and coming occasions according to occasion and participate in them.

Attendance Simulator (08/2017 - 11/2017)

- It was a individual project based on C language. It takes aggregates quantities of classes per semester and classes you have joined in. Furthermore, gives the participation rate and what number of more classes are required for getting qualified for exams.
